

1. MWENJE NYARUMWE IRRIGATION SCHEME – CHIWESHE

Location:	Chiweshe
Expected Output:	<ul style="list-style-type: none">• Functional irrigation system to irrigate 97 hectares of land.
Overall progress	75% to completion
Socio-economic outcomes	<ul style="list-style-type: none">• On completion, the intention is to irrigate about 97 hectares of land, and this will create approximately 200 jobs for the locals and more jobs for the downstream activities.
Challenges	<ul style="list-style-type: none">• Lack of security personnel to guard the installed centre pivots. These can easily be vandalised or cannibalised especially the control boxes, since they are currently not in use.• Lack of capacity by the beneficiaries to maintain the installed infrastructure.
